

Lecture 1

- AY Reminder : Start twitch.tv stream

Blending Art and Technology (45 min)

- [slides](#)

Instructor Bios (10 min)

- [slides](#)

Announcements

- Reminder– it is possible to attend lectures remotely / from home via lecture recordings. If the room is crowded, it may have a better experience this way (and you can slow down / speed up / rewind the lecture at your pleasure).
 - The in-person crowds should dissipate entirely within a lecture or two.
- Assignments Released (we will talk more about it Wednesday, as students usually don't begin until then).
 - [1. Blender Basics](#)
 - Please check your email inbox for a message from **technical-art-course@umich.edu** on the topic of your git repository– you must have it set up in order for you to complete the homeworks. It was either [generated successfully](#) or [it failed and you must do something](#).
- Learning Blender [feels about like this](#).
- Please bring your laptops to lecture (charged) so that we may do models together. Starting next week, our lectures will conclude with 30 minutes to complete the “daily 20-minute model” (an assignment launching next week).
- (extra credit) [IGDA this Thursday](#)

What is EECS 298? (45 min)

- [slides](#)
