Announcements

- How to plan complex animation sequences? Resident Evil 7 team acts out their own cutscenes.
 - [Final finished cutscene](#) (warning: horror, violence, gore, and language)
 - [First iteration of scene.](#)
 - [Making of Resident Evil 7 documentary](#)
 - [Also from Capcom : Devil May Cry 5 cutscene planning.](#)
- [Bad Apple](#) : The animation that became a benchmark and [gets ported to everything](#) (kinda like *Doom*).
- From here on out, assignments will be less “hand-holdy” when it comes to Blender-related topics. New topics will still be well-guided, but homeworks will begin to assume you can handle things on older topics.
- Assignments Due
 - [4. Armatures and Key Poses](#)
- Assignments Released
 - [5. Animation](#)

Workshop : Basic Animations (60 min)

- [Starting Point](#)
- Q : How many keyframes are on [this timeline?](#) Surprising answer : Only 2 (not 6, despite the 6 icons). The other 4 are showing a keyframe icon to indicate that the “category” they represent has one or more keyframes.

- This week : focus on pragmatics of animation in Blender (User Interface, tools, NLA editor, Graph Editor, audio integration, animating strange things (textures, materials, shape keys, etc), etc).
- Next week : focus on animation principles, style, and artistry, along with some other fun stuff and some more difficult pieces.
- In other words, this week is about “what” and “how”, and next week is about “why”.
- [Animation is hard \(part 2\)](#)
- The Timeline in Blender
 - Timeline controls (spacebar to run and stop).
 - Setting a beginning and end for playback.
- Keyframes in Blender
 - Manual insertion (“I” hotkey).
 - Auto-keyframe button on timeline view.
 - Turning keyframes on and off for individual properties.
 - Manipulating keyframes on the timeline.
 - Using “scale” (s) to speed up an animation.
 - Using “translate” (g) to move around pieces of keyframes.
 - Technique : Duplicating the first keyframe and copy-pasting it to conclude the animation.

Workshop : NLA

- Once a strip is created, the NLA will begin to affect how you see the object in the viewport. Often, it makes things weird / confusing. “Silence” the NLA track [as seen here](#) to simplify the situation and edit your actions in peace.

Daily 20-minute Model (30 min)

- 20 minutes for production
- 10 minutes for upload to sketchfab
- Post in discord server and [in this form](#)
