Announcements

- Assignment Due
 - [8. Game Engines](#)
- Assignments Released
 - [9. Interactive Character](#)
 - **Warning :** This will be longer and tougher than homework8. You will be creating a character from scratch and importing it into Unity (tofu) after creating many different actions for them. You will also resolve some challenging new model portability issues, and build some interesting interaction chains in the 3D platformer testbed.
- Having issues with Unity on homework8? Please attend office hours ASAP, as you will struggle on all remaining assignments if your Unity fails to build / run properly.
