## Course : EECS 494 : Intro to Game Development

- Backpacking is underway and registration should begin soon.
- Infamous for its difficulty, you will have a significant leg up due to your EECS 498 work.
  - Focused entirely on Unity
  - Much, much deeper exploration of game design / UX for engagement.
  - Much deeper exploration of programming design patterns.
  - Re-make Zelda or Metroid! ([with a motorbike?](#))
  - [Make large games \(that may even be commercially viable!\)](#)
  - [Enjoy a large showcase event!](#)
- Credit Considerations
  - EECS 494 is a capstone / MDE just like 498. **It will not count as an ULCS if you take it.**
  - Still may be worthwhile if you're looking to work in Visualization / XR / GameDev / Simulation.

## New Course : EECS 498.007 : Game Engine Architecture

- [Build your own miniature game engine.](#)
- [Engine progression slide](#)

- ULCS Credit
- Winters Only

## Course : EECS 440 : Extended Reality for Society

- **Backpacking is underway and registration should begin soon.**
- Lighter than EECS 494.
- Provides knowledge of Unreal Engine and VR / AR development.
- An exceptionally good idea for those who wish to work in GameDev, Visualization, XR, or game-adjacent spaces.
- Note : Capstone course (will not count as an ULCS, but should count as FlexTech).
