Storytelling in 3D Platformers (30 min)

- [Hero's Journey](#)
- [Save the Cat](#)
- The Spyro Method (play demonstration on laptop)
 - "Something bad is happening"
 - <fixing the thing>
 - Sub-problems occur
 - "Thanks! Here's the wonderful impact you made!"
- **Spyro 2 example**
 - Beginning : Each stage begins with a statement of the main problem in a safe area.
 - Middle : The player runs into various obstacles and tasks– each of them connected to the overall problem or theme in some small fashion.
 - End : The player has solved the problem and received a reward. Player sees the outcome of their efforts.
- **Daisy's Tomb Raider example ([playable here](#))**
 - Beginning : Luigi has gone missing and the pyramid is behaving strangely. The outside of the pyramid is entirely safe for practice.
 - Middle : The player enters the tomb, avoids traps, and overcomes a few deadly trials.
 - End : The player frees Luigi and escapes the pyramid in dramatic fashion. The two observe that the pyramid has calmed.
- "The Hollow Knight / Dark Souls Approach"

- Objectives and problems are left ambiguous / vague, and almost never directly told. Environmental clues and NPC interactions give small bits of information that must be put together like a puzzle.
